### **NEW GAGE DECK-BOSS BIBS STAND UP TO THE TOUGHEST JOBS**

Heavy-Duty Fabric is Waterproof, Breathable and Extremely Abrasion Resistant

Grundens USA has added to its growing Gage Technical Gear line with its new Deck-Boss Bib Pant, specially designed to combine waterproof, breathable protection with tough-as-nails construction.

“If your work environment cuts normal bibs to shreds, the new Deck-Boss is made for you,” said Grundens USA President Mike Jackson. “We developed these bibs at the request of our toughest customers, to withstand repeated abrasion from wire, barnacles, scallops, rock, concrete, steel and other rough surfaces. If your work (or fun) has you crawling around on deck, moving heavy gear or getting down-and-dirty in the fish hold, these bibs have you covered. They are not as easy as PVC to keep clean, but they wear like iron,” Jackson added.

Grundens tailors the new Gage Deck-Boss from 10,000mm three-ply waterproof nylon fabric that seals out rain and spray, yet breathes to keep hard-working fishermen and mariners from overheating during strenuous activity. A high-cut bib design provides ample coverage, while simple suspender hook-ups make it easy to get geared up. Professional quality features abound, including neoprene and Velcro leg closures to keep moisture out in the roughest conditions, a secure inside chest pocket and spacious thigh cargo pocket.

Grundens offers the Gage Deck-Boss Bib in solid black or red with black thigh pocket/seat. With available sizes from XS-5XL, a comfortable fit is assured for every member of the crew — from the actual deck boss to the newest greenhorn. This professional-grade gear is now available at authorized Grundens dealers throughout North America and carries an MSRP of \$169.00 (sizes 3XL-5XL slightly higher).
