GRUNDÉNS ADDS NEW NIGHTWATCH PUFFY JACKET TO ITS GROWING GAGE TECHNICAL GEAR FAMILY

**Lightweight Insulated Jacket Delivers Added Warmth, Wind Protection and Comfort
On Deck or in The Great Outdoors**

Grundéns USA has added the new Nightwatch Puffy Jacket to its growing line of Gage Technical Gear products, providing fishermen, boaters and outdoor adventurers of all kinds with a new level of warmth, wind protection and comfort. This new lightweight jacket is the only such quilted garment for sportsmen made by Grundéns — the company known for protecting Bering Sea crab fishermen and other professional mariners working in the harshest environments in the world.

Tailored from 100-percent water-resistant nylon material and featuring numerous small quilted “pockets” of soft, water-resistant insulation, the Gage Nightwatch Puffy is ideal for layering under foul weather gear on cold, blustery days or wearing as a stand alone jacket to ward off a chilly spring wind. Its unique quilted insulation maximizes retention of body heat while reducing bulk, allowing for full freedom of movement whether working on deck, battling a big winter bluefin or climbing a vertical rock face. Worn inside or out, the wind-cutting Nightwatch Puffy is the perfect way to make every job or outdoor activity more comfortable and enjoyable.

Like all Grundéns gear, the Gage Nightwatch Puffy is packed with professional-grade features and built to perform through seasons of tough use. Features include a heavy-duty full-length zipper, adjustable drawcord hem, elasticized cuffs to seal out cold and wind, and two large zippered handwarmer pockets.

To accommodate a wide range of fishermen and outdoor adventurers, Grundéns offers the Nightwatch Puffy in sizes from XS to 5XL. Available colors include Orange, Black and Deep Forest Green. The Nightwatch Puffy carries an MSRP of \$138 (sizes 3XL-5XL slightly higher).
